

SAFETY DATA SHEET

TrapAll™ T.A.

1. IDENTIFICATION

Product code: TATUT

Product name: TrapAll™ T.A.

Chemical contents: Tomato leafminer pheromone.

Product description, recommended uses and restrictions:

This product consists of tomato leafminer pheromone impregnated in a grey rubber septum that should be used together with a water trap. This product is intended for use in agricultural crops for the mass trapping of male tomato leafminer (*Phthorimaea* previously *Tuta absoluta*).

Supplier: Insect Science (Pty) Ltd.
9 Industria Street, New Industrial Area, Tzaneen, 0850, South Africa

Telephone: 015 307 1391 / 015 065 0199

Emergency number: 015 307 1391 / 015 065 0199 (office hours)

In case of poisoning: Griffon Poison Information Centre 082 446 8946
Tygerberg Hospital 021 931 6129
Poison Emergency Enquiries 021 689 5227

2. HAZARD IDENTIFICATION

Classification of substance or mixture according to GHS; Regulation (EC) No 1272/2008

Hazard Class	Hazard Category	Hazard Statement
Health		
Skin Irritation	Category 2	H315

Label elements

Pictograms:

Signal word: Warning

Hazard statement(s):

H315: Causes skin irritation.

Precautionary statements:

P280: Wear protective gloves.

P264: Wash hands thoroughly after handling.

Tel +27 (0) 15 065 0199 • E-mail info@insectscience.co.za • www.insectscience.co.za

P302+P352: IF ON SKIN: Wash with plenty of water.

P332+P317: If skin irritation occurs: Get medical help.

P362+P364: Take off contaminated clothing and wash it before reuse.

Supplemental hazard statement(s):

H413: May cause long lasting harmful effects to aquatic life.

Other hazards: Not known

3. COMPOSITION / INFORMATION ON INGREDIENTS

Substance / mixture: Mixture loaded into a grey rubber septum

Substance name: *Tuta Pheromone blend*

CAS registry number: Various

Synonyms: T.A. Pheromone

Hazardous ingredients according to GHS

Component	CAS registry number	Concentration	Classification 1272/2008	EC
Tuta pheromone blend	Proprietary	> 95%	Skin Irrit. 2 (H315)	

4. FIRST-AID MEASURES

When loaded in the dispenser, the impregnated substance represents less of a hazard than the neat substance.

General advice

Ingestion: If swallowed, wash mouth with water if person is conscious. Never give anything by mouth to an unconscious person. The impregnated substance is not classified as toxic by oral consumption. The device may represent a choking hazard. Obtain medical attention if necessary.

Skin contact: The impregnated substance may cause skin irritation. In case of contact, remove contaminated clothing if applicable and wash area of exposure with non-abrasive soap and copious amounts of water for several minutes. Consult a physician if irritation persists.

Inhalation: The impregnated substance is not expected to be acutely toxic by inhalation. If inhaled, remove the source of contamination or move victim to fresh air.

Eye contact: Immediately flush eyes with clean water for several minutes, holding the eyelids open. If present, remove contact lenses after 5 minutes. Continue rinsing. Consult a physician if irritation persists.

Most important symptoms and effects, both acute and delayed: The impregnated substance is considered a skin irritant and may cause skin irritation.

Indication of any immediate medical attention and special treatment needed: There is no specific antidote available. Treat symptomatically and supportively.

Tel +27 (0) 15 065 0199 • E-mail info@insectscience.co.za • www.insectscience.co.za

5. FIRE-FIGHTING MEASURES

This material is not flammable.

Extinguishing media

Suitable: Where possible, extinguish fire with dry chemical powder, foam or carbon dioxide.

Unsuitable: Not known.

Specific hazards arising from combustion: Carbon monoxide and carbon dioxide.

Special precautions for fire-fighters: Remove spectators from the area. Stay upwind of fire to avoid inhalation of hazardous vapours and fumes. Wear self-contained breathing apparatus and protective clothing where necessary. Always fight fires from the maximum distance, especially in the case of hazardous material. Contain fire control agents for later disposal.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures.

Wear impermeable gloves when handling the product to avoid contact with skin.

Environmental precautions: This product is not expected to be harmful to the environment when used according to recommendations.

Methods and materials for containment and cleaning up: Spillage is unlikely. Clean up devices and dispose of according to local regulations. Burning or dumping of this material is prohibited.

7. HANDLING AND STORAGE

Precautions for safe handling: KEEP OUT OF REACH OF CHILDREN AND ANIMALS. Before handling, ensure that all hazards are understood and the correct personal protective equipment is used (refer to section 8 of this SDS). This product may cause skin irritation. Avoid contact with skin. Wash hands thoroughly after use and before eating, drinking, smoking or using the toilet. Wash contaminated clothing after use.

Conditions for safe storage, including any incompatibilities: Store containers locked away and out of reach of uninformed persons or animals. Store the product in its original, labelled, closed container in a cool, well-ventilated area, away from heat or open flames. Never transfer this product to another container for storage. Always comply with local regulations.

8. EXPOSURE CONTROL / PERSONAL PROTECTION

Permissible concentrations:

No occupational exposure limits have been set for any of the ingredients used in the manufacturing of this product.

Engineering controls: Adequate ventilation is essential. The appropriate measures that need to be implemented at a worksite will depend on the way in which the product is used and

Tel +27 (0) 15 065 0199 • E-mail info@insectscience.co.za • www.insectscience.co.za

on the extent of worker exposure. Provide local exhaust ventilation systems to maintain airborne concentrations below permissible exposure limits.

Personal protective equipment:

Eye / face protection: Avoid touching eyes when handling the product.

Skin protection: Avoid contact with skin. Handle with impermeable gloves.

Respiratory protection: Avoid breathing mist or vapours.

9. PHYSICAL AND CHEMICAL PROPERTIES

Data extrapolated from other straight chain Lepidopteran pheromones (SCLP) [Peer review of the pesticide risk assessment of the active substance Straight Chain Lepidopteran Pheromones; EFSA 2014; 12(1):3524]

Physical state: Liquid blend loaded into a rubber septum

Colour: Yellow liquid

Odour: Characteristic pheromone odour

Melting point / freezing point: Not available

Boiling point or initial boiling point and boiling point range: 242-249 °C

Flammability: Not flammable

Lower and upper explosion limit / flammability limit: Not explosive

Flash point: 126 °C

Auto-ignition temperature: Not available

Decomposition temperature: Rapid degradation, evaporation and volatilization can be expected for all SCLPs

pH: Not available

Kinematic viscosity: Not available

Solubility: Totally soluble in organic solvents.

Partition coefficient n-octanol / water (log value): log P = 5.61 – 6.25 (25 °C)

Vapour pressure: 0.157 – 0.094 Pa (20 °C); 0.162 – 0.245 Pa (25 °C)

Density and/or relative density: Not available

Relative vapour density: Not available

Particle characteristics: Not available

10. STABILITY AND REACTIVITY

Reactivity: No data available.

Chemical stability: Rapid degradation, evaporation and volatilization can be expected for all straight chain Lepidoptera pheromone (SCLP) actives.

Possibility of hazardous reactions: No data available.

Conditions to avoid: Open flames.

Incompatible materials: No data available.

Hazardous decomposition products: No data available.

11. TOXICOLOGICAL INFORMATION

Acute toxicity (calculated according to GHS)

Oral > 5000 mg/kg (rat)

Dermal > 5000 mg/kg (rabbit)

Inhalation > 20 mg/L (rat)

Skin corrosion / irritation: Causes skin irritation.

Eye damage / irritation: May cause eye irritation.

Respiratory or skin sensitization: Not considered a respiratory or skin sensitizer.

Germ cell mutagenicity: Not considered a mutagen.

Carcinogenicity: Not considered a carcinogen.

Reproductive toxicity: Not considered a reproductive toxin.

Specific target organ toxicity single exposure: Not considered a target organ toxicant after single exposure.

Specific target organ toxicity repeated exposure: Not considered a target organ toxicant after multiple exposure.

Aspiration hazard: Not considered an aspiration hazard.

12. ECOLOGICAL INFORMATION

This impregnated mixture is not classified as environmentally hazardous. Further, application through a dispenser is considered to have minimal ecological impact.

Ecotoxicity (neat pheromone material)

Fish

LC ₅₀ (96h)	<i>Oncorhynchus mykiss</i>	6.35 mg/L*
------------------------	----------------------------	------------

Birds

Acute oral LD ₅₀	> 2250 mg/kg body weight*
-----------------------------	---------------------------

Dietary LC ₅₀ (8d)	> 5620 mg/kg feed*
-------------------------------	--------------------

Daphnia

LC ₅₀ (48h)	<i>Daphnia magna</i>	0.38 mg/L*
------------------------	----------------------	------------

Algae

EC ₅₀ (96h)	<i>Pseudokirchneriella subcapitata</i>	0.3 – 1.3 mg/L*
------------------------	--	-----------------

Bees

LD ₅₀	Limited toxic effects observed*
------------------	---------------------------------

Worms

LC ₅₀ (14d)	No data available
------------------------	-------------------

*based on the lowest endpoint of SCLP acetates

Persistence and degradability: Rapid degradation, evaporation and volatilization can be expected for all straight chain Lepidoptera pheromone (SCLP) actives.

Tel +27 (0) 15 065 0199 • E-mail info@insectscience.co.za • www.insectscience.co.za

Bio-accumulative potential: Rapid degradation, evaporation and volatilization can be expected for all straight chain Lepidoptera pheromone (SCLP) actives.

Mobility in soil: No data available. The product is not expected to come into direct contact with the soil when used according to recommendations.

Plants: No data available. The product is not expected to come into direct contact with plant material when used according to recommendations.

Other adverse effects: Not known.

13. DISPOSAL CONSIDERATIONS

Disposal methods: Open dumping or burning of this device is prohibited. According to the regulations regarding extended producer responsibility (National Environmental Management: Waste Act, 2008; Act No. 59 of 2008), the used device needs to be incinerated or recycled by an approved recycler. Unused product that has expired needs to be incinerated.

14. TRANSPORT INFORMATION

UN number:	Not regulated.
UN proper shipping name:	Not regulated.
Transport hazard class:	Not regulated.
Packaging group, if applicable:	Not regulated.
Environmental hazards:	Not considered a marine pollutant.
Special precautions for user:	None

15. REGULATORY INFORMATION

Safety, health and environmental regulations / legislation used:

Regulations for hazardous chemical agents, 2021. Occupational Health and Safety Act, 1993.

OSHA 1993 Regulations for hazardous chemical substances.

EU regulation: Regulation EC1272/2008 (EU-GHS/CLP).

United Nations Globally Harmonized System of Classification, ninth revised edition, 2021.

Peer review of the pesticide risk assessment of the active substance Straight Chain Lepidopteran Pheromones; EFSA 2014; 12(1):3524

16. OTHER INFORMATION

Packaging: Packaged as a ready-to-use lures (tradename T.A. PheroLure®) that should be used in conjunction with an Insect Science (Pty) Ltd. Water Trap.
